

ANTIFENIX

A Call For Solidarity!

Police repressions - anarchists are charged with "preparation of terrorist acts"

"No repression can stop a longing for freedom!"

'Operation Fenix' is the biggest wave of police repressions against the anarchist and radical left movement in recent czech history.

Taking people in the early morning hours, raiding flats and social center Ateneo, accusations of 'preparation of terrorist acts' and confiscation of a server, which held several activists' sites, all came with 'Operation Fenix' which started on Tuesday, 28th of April. Anti-extremist police of Czech Republic is actively trying to frighten, discredit and divide the anarchist and anti-authoritarian movement and collect information about people that are part of it in a fishing expedition. Over 30 people have so far been arrested or interrogated.

This is our distress call for international solidarity. Police put out an informational embargo on the operation, although some details have leaked to the media. Today on Friday the 22nd of May there are still 3 people in police custody.

Police tactics will not be successful. We will not let ourselves get frightened, we will continue with our political practice. *If you wish to help us, we will gladly accept any political or financial solidarity.*
